PROFESSIONAL SUMMARY

Automation and data professional with 11 years across software development, RPA, product management, leadership and analytics, now focused on Power BI and decision reporting. Built 50+ production automations at Dexterous Group delivering ~70 hours and ~AUD 2,800 in savings per month, and designed the Jira-to-Power BI reporting pipeline used for sprint and workload decisions by the leadership team.

Progressed from C# developer to RPA Team Leader to Senior Automation Developer / IT Lead, leading teams of 3-4 while staying hands-on in Power BI, DAX, SQL, and Python.

TECHNICAL SKILLS

Business Intelligence & Analytics — Power BI (Desktop, Service), DAX, Power Query / M, data modeling, star schema, measures and calculated columns, date tables, row-level security, scheduled refresh, KPI reporting, data visualization

Data & Databases — SQL, T-SQL, stored procedures, views, user-defined functions, SQL Server, PostgreSQL, MySQL/MariaDB, SSMS, ETL and data pipelines

Automation — UiPath, Power Automate, VBA, Python, process automation, process optimization, production support

Software Development — C#, VB.NET, ASP.NET Core, Entity Framework Core, Python, REST APIs, Visual Studio, VS Code

Deployment & Version Control — Docker, GitHub Actions CI/CD, Render, DigitalOcean, Git, GitHub

Delivery & Business — Requirements analysis, Agile, Jira, sprint planning, QA/QC and test design, stakeholder management, team leadership, technical documentation

Microsoft & Collaboration — Microsoft 365, SharePoint, Excel (advanced)

KEY IMPACT HIGHLIGHTS

- Led and managed cross-functional automation teams (RPA developers, IT operations, product coordinators)
- Owned automation product strategy, roadmap, and delivery from discovery to production
- Delivered 50+ RPA and AI-driven automations improving operational efficiency and reducing manual workload
- Built Power BI dashboards and reporting pipelines to drive KPI tracking and business performance insights
- Established engineering, security, and delivery standards across IT and automation teams

EXPERIENCE

SENIOR AUTOMATION DEVELOPER / IT LEAD, 01/2026 - 04/2026 - Full time -Remote Based
Dexterous Group Pty Limited – New South Wales, Australia

- Led a 4-person automation and IT operations team, owning delivery of DexIQ, an internal automation and AI platform, from requirements through production release.
- Ran sprint planning, backlog prioritization, and delivery tracking in Jira; [ADD OUTCOME — e.g. cycle time, on-time delivery %, release frequency, incident reduction].
- Established production-readiness standards covering testing, documentation, security, scalability, and reliability, reducing post-release defects [ADD FIGURE IF YOU HAVE IT].
- Served as escalation point for technical and delivery risk across engineering, operations, and business stakeholders.
- Defined and tracked delivery and operations KPIs used to direct team capacity and improvement priorities.

RPA DEVELOPMENT LEAD, 06/2025 - 01/2026 - Full time -Remote Based

Dexterous Group Pty Limited – New South Wales, Australia

- Built an automated Jira-to-Power BI reporting pipeline — Python extraction on scheduled execution into a governed dataset, feeding an auto-refreshing Power BI report delivered to leadership on a set cadence, with an AI-generated weekly sprint summary.
- Designed and delivered ~10 Power BI reports covering automation performance, finance forecasting, Jira team KPIs, and workload distribution, used directly in capacity allocation and finance decisions.
- Led a 3-person RPA team through the full delivery lifecycle: requirements, development, QA/QC, documentation, deployment, and production support.
- Introduced structured QA/QC and test practices that improved release quality and automation uptime.
- Mentored engineers through 1:1s, performance support, and career development while managing stakeholder timelines.
-

RPA DEVELOPER, 09/2022 - 05/2025 - Full time -Remote Based

Dexterous Group Pty Limited – New South Wales, Australia

- Designed, developed, tested, and maintained 50+ production RPA solutions in UiPath, delivering approximately 70 hours and AUD 2,800 in savings per month.
- Built reusable automation components, frameworks, and scripts that cut build time on subsequent automations and standardised error handling across the portfolio.
- Monitored production robots, schedules, and server utilisation, resolving failures to maintain continuous operation across business-critical finance processes.
- Developed supporting databases, internal applications, and APIs, including SQL data models feeding downstream reporting.
- Built Power BI reports for operational monitoring and performance analysis, translating process telemetry into metrics business owners could act on.

FULL STACK C# SOFTWARE DEVELOPER, 09/2017 - 08/2022 – Full time - Onsite

EHS Lens Philippines - Tanauan City, Philippines

- Developed and maintained enterprise applications in C#, VB.NET, VBA, and SQL supporting manufacturing operations for 500 users across 10 departments.
- Designed and optimised SQL Server databases, views, stored procedures, T-SQL, and user-defined functions, including query tuning on high-volume production tables.
- Gathered requirements from operations stakeholders and translated them into delivered software, owning the full lifecycle through deployment and support.
- Reviewed code for performance and reusability, and diagnosed and resolved production defects.
- Produced technical specifications, requirements documentation, and end-user training materials.

TECHNICAL SUPPORT ENGINEER, 07/2015 - 08/2017 - Full time - Onsite

EHS Lens Philippines - Tanauan City, Philippines

- Provided IT and network support for 400+ users across the organization
- Managed servers, workstations, and network infrastructure
- Handled troubleshooting, system maintenance, and technical support requests

SELECTED ANALYTICS PROJECTS

E-Commerce Performance Analysis — *Power BI · DAX · Power Query · star schema*

Analysed the public Olist Brazilian e-commerce dataset to assess delivery performance, customer experience, and commercial concentration. Delivered a three-page report (Executive Overview, Delivery & Customer Experience, Commercial & Geographic Performance), a written case study, and a stakeholder presentation. [link]

Incident Performance & Operational Analysis — *Power BI · DAX · data modeling*

Simulated ITSM case study examining SLA attainment, resolution efficiency, reassignment patterns, and workload distribution across support queues. Delivered a three-page report, written case study, and stakeholder presentation, with findings framed as operational signals rather than causal claims.

FlowOps — Operations & Delivery Management Platform — *C# · ASP.NET Core · EF Core · PostgreSQL · Docker · GitHub Actions*

Full-stack web application for service-desk and delivery teams, publicly deployed via containerised CI/CD to Render with managed PostgreSQL.
